Structural and Thermal Performance

Style	Tested Size	U-Factor/Air	AWDA Rating
Single Hung	48" x 72"	0.33	R-PG30
Picture	60" x 60"	0.30	R-PG40
Slider	63" x 44"	0.33	R-PG30

Color Options

All styles available in SuperCapSR™ color technology. SuperCapSR is 12x harder than competitive paint-applied coatings and exceeds AAMA 614 weathering standards and is available in the following colors:

*Printing limitations prevent exact color duplication. Contact your AWS representative for color samples.

What's Your Style?

Single Hung

Our Single Hung system allows for the functionality of an average single hung system without sacrificing the thermal performance and structural stability of your home.

Picture Window

If you want to let in natural light and maintain the temperature of your home, this window is perfect. With a U-Factor of .27, this style assures you're selecting a thermally efficient window for your home.

Horizontal Slider

Wide views of your scenic environment enhance the interior beauty of your home. The horizontal slider gives the same functionality of the single hung, but doubles the width of the view creating a seamless transition from the interior and exterior of your home.
