

SAVE ENERGY WITH ENERGYCORE™ WINDOWS

THE NEXT GENERATION WINDOW SYSTEM

Now there's a technological vinyl window frame breakthrough that combines with high-performance glass for the most energy-efficient window system available. The new EnergyCore™ Window System uses an innovative, patent-pending, fusion-insulated technology called AirCell™. The result? Virtually no maintenance windows for replacement or new construction projects that exceed Energy Star® performance requirements by up to 50%.

PICTURE WINDOW

AIRCELL™ THERMALLY OPTIMIZED FRAME provides greater efficiency without voids and improves insulating performance 15% better than hollow vinyl window frames

WARM-EDGE INSULATED GLASS unit improves thermal performance and helps reduce condensation

HIGH PERFORMANCE LOWE³ GLASS STANDARD provides optimal solar heat gain control to improve interior comfort and energy savings

PRECISION MITERED FUSION-WELDED CORNERS provide superior structural strength and weather resistance

3-1/4" DEEP WINDOW FRAME for increased rigidity and thermal performance — also ideal for replacement use

FULL WINDOW SYSTEM FAMILY also includes single hung, double hung, double slider, casement and awning windows

AirCell™ Insulated Frame
